Healthy Teton County (HTC) is a community health initiative led by the Teton County Health Department and St. John's Medical Center (SJMC). This is the second iteration of the Community Health Needs Assessment completed by HTC. In this report HTC prioritized the social determinants of health (SDOH) separately because making positive change to the SDOH requires different strategies from health behaviors and conditions. This abbreviated iteration the CHNA used three assessments: the community health data, a quality of life survey and the forces of change (conducted during the stakeholder meeting). The local public health system assessment was not repeated because there were no significant changes since it was initially completed. The next step in the process is to develop a Community Health Improvement Plan.
