

## Certification Statement

This certification of completed construction is acknowledged by:

(Printed Name) \_\_\_\_\_:  
who is the Professional Engineer in responsible charge of the design permitted by Teton County as  
\_\_\_\_\_ (or a substitute who is likewise qualified, and willingly accepts the approved design as  
though it were his/her own).

By providing this signed certification statement, a reasonable level of assurance is conveyed by the Engineer that appropriate means have been exercised to verify that construction of the designed, permitted work has been completed substantially in accordance with that design and permit conditions that the Engineer's informed expectation is that the work shall function properly for its intent.

This certification is not to be construed as a guarantee or warranty of work. The methods practiced by the Engineer in verifying that the work conforms with the design are at the discretion of the Engineer, and are commensurate with his/her judgement of how closely the construction must be monitored to reasonably assure that the proper intended function of the design is realized. If changes to the permitted design were made to the work during construction, they are summarized and represented by appropriate record drawings provided with this certification.

Acknowledged \_\_\_\_\_

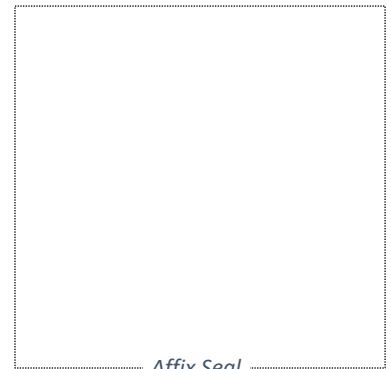

Date: \_\_\_\_\_

PE License Number: \_\_\_\_\_

Changes and/or Record drawings provided: \_\_\_\_\_ (initial)
