

Teton County Guidelines for the General Public During Red, Orange and Yellow Phase

Category	Recommendations
General	<p>Follow any other standards set by the Centers for Disease Control and Prevention (CDC), the Wyoming Department of Health or Teton County Health Department</p> <p>Follow Strict Hygiene Standards, including:</p> <ul style="list-style-type: none"> • Wash hands with soap and water for at least 20 seconds as frequently as feasible • Use hand sanitizer (at least 60% alcohol based) when soap and water are not available • Cover coughs or sneezes into the sleeve or elbow, not hands • Regularly disinfect high-touch surfaces (buttons, door handles, counters, etc.) • Avoid touching your face • Stay home when sick <p>Follow Physical Distancing Measures:</p> <ul style="list-style-type: none"> • Wear a cloth face covering in public when you cannot maintain the 6-foot physical distance spacing • Always maintain a 6-foot distance from other individuals when in public • Refrain from shaking hands with other individuals • Do not visit friends or family without urgent need • Do not attend large gatherings • Phone and video chats are encouraged in place of in-person meetings
High-Risk Individuals	<p>Please Read Teton County Health Department’s Appendix C- Guidelines for High-Risk Individuals for more information. Also See CDC recommendations for "People Who Need Extra Precautions" to obtain more specific guidance for high-risk individuals.</p> <p>“High-risk individuals” are identified as those 65 years of age and older, those living in a nursing home or long-term care facility and those of all ages with underlying medical conditions particularly if not well controlled. These medical conditions include: people with chronic lung disease, moderate to severe asthma, serious heart conditions, diabetes, severe obesity, chronic kidney disease undergoing dialysis, liver disease, or otherwise immunocompromised (undergoing cancer treatment, bone marrow or organ transplantation, immune deficiencies, poorly controlled HIV or AIDS, and prolonged use of corticosteroids and other immune-weakening medications). There is also research that supports higher risk for severe illness for those that smoke or vape. While pregnant women seem to have the same risk as adults who are not pregnant, pregnant women should protect themselves from exposure to COVID-19 and should take similar precautions as high-risk individuals.</p> <p>Households with high-risk individuals should consider providing more intensive precautions and should conduct themselves as if they are a significant risk to the high-risk individual by:</p> <ul style="list-style-type: none"> • Wearing a cloth face covering • Frequently washing hands before interacting with the person, including feeding of caring for the person • Providing a protected space for the high-risk household members, if possible • Ensuring all utensils and surfaces are regularly disinfected • Those who are, or work with, high-risk populations should undergo daily screening/symptom monitoring and should be tested if they develop COVID-19 symptoms • High-risk populations should take extra precaution to avoid close contact with multiple people, including having the same caretakers whenever possible
Households with Sick Family Members	<ul style="list-style-type: none"> • Give sick members their own room if possible and keep the door closed • Consider providing additional protections or more intensive care for high-risk household members; see CDC guidance for caring for a sick family member at home • Have only one family member care for them
