

# Teton County's Critical Risk Phase

What does **PURPLE** mean and what can you do?

Teton County Health Department has developed a color-coded public health guidance system to provide actions our community members can take to decrease the spread of COVID-19.

A number of our metrics have moved into a "Critical" category. This means we have widespread transmission of COVID-19 in our community and have overwhelmed our Case Investigation and Contact Tracing team with new cases.

## Gather with household members only.

Avoid other social, recreational, and extracurricular gatherings with members outside of your household.

## Space out at work.

Allow telework as much as possible. Within offices and businesses, implement staggered schedules and sanitize spaces and objects daily. Wear a mask while at work.

## Avoid crowded spaces.

Avoid the "3 C's": Spaces that are **Crowded**, have high potential for **Close contact**, or are **Confined** and enclosed with poor ventilation.

## Reduce your trips to get food and limit other errands.

Only send one person per household. Contactless, curbside, delivery, takeout, and virtual services are strongly encouraged.

## Limit your travel.

Travel for essential purposes only. Upon return, self-monitor for symptoms and test on or after day seven.

## Socialize virtually.

Do not participate in or arrange in-person social activities. Prioritize attending outdoor activities over indoor activities and host social gatherings virtually.

## Keep your surfaces clean.

Routinely disinfect high touch surfaces in your home.

## Protect vulnerable populations.

No non-essential visitors to hospitals, nursing homes and other residential care facilities.

Everyday preventative measures that can decrease risk, when combined with other recommendations

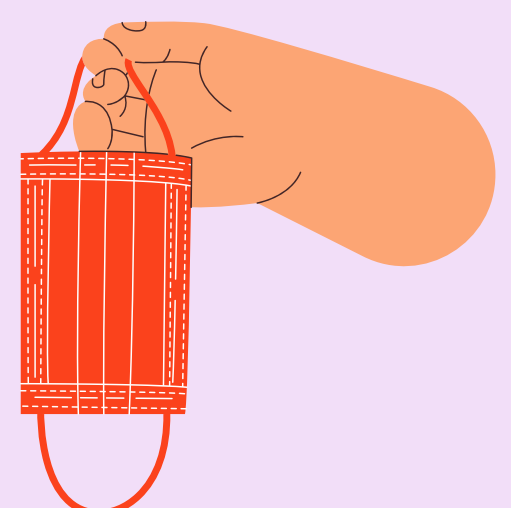

## Stay home.

Stay home when sick, even with mild symptoms. Cover coughs or sneezes by using your elbow or sleeve, not your hands.

## Wear a mask.

Always wear a dry mask with multiple layers in public.

## Keep your distance.

Maintain at least a 6-foot distance from others when in public, even when wearing a mask.

## Wash your hands regularly.

Wash your hands with soap and water for at least 20 seconds and use hand sanitizer when soap and water are not available.
