

Opportunity for Public Feedback on the Future Plans for Teton County parcel on Spring Gulch Road

Teton County has developed a preliminary concept to improve public access and rehabilitate vegetation on a publicly owned parcel on Spring Gulch Road. This Vegetation Mitigation project is a requirement from the 2018 Replacement of the Cattleman's Bridge. This site is on Lot 45 of JH Golf & Tennis on the northeast end of Cattleman's Bridge over the Gros Ventre River. Improvements include completing the pathway connection that currently terminates near Kings Hwy to the bridge, formalizing a recycling area, planting vegetation, and improving the overall aesthetics of the parcel. Lower Valley Energy is also planning to bury the overhead powerlines in this area. The project is expected to be completed by Spring 2022.

The public is encouraged to provide input and feedback to Jazmine Watson at jwatson@tetoncountwy.gov by June 2, 2021.
