Engineering Permit Fee Resolution Adopted by County Commissioners

July 15, 2025, Jackson, Wyo. – During a regular meeting of the Teton County Board of County Commissioners on Tuesday, July 15, County Commissioners approved a resolution to adopt Fiscal Year (FY) 2026 engineering fees associated with small wastewater facility permits, grading and erosion control permits, work in live waterbody permits, bridge permits, right of way permits, driveway access permits, and floodplain permits.

The new permit fees go into effect on Monday, July 21, 2025. Revenue generated from permit fees help offset costs associated with permit review, including staff time and permit application review consultants, and small wastewater facility permitting software. Teton County engineering permit fees were last adjusted in 2020.

Public notice on the proposed fee change was published on May 14, 2025, in connection with a 45-day public comment period. Public Works received one public comment in support of the fee adjustment.
